Use

Open the air valve of the tube and inflate it carefully, close the air valve when it is full of air.

Press the power button once to activate the light.

Press the power button two times for the warm light low light mode.

Press the power button three times for the warm light medium light mode.

Press the power button four times for the warm light highlight mode.

Press the power button five times to turn it off.

Under any lighting mode, long press the power button to perform stepless dimming and white warm light conversion.

Open the air valve and press down it to let the air out slowly to fold the tube.

Charging

The tube can be charged with a USB charger. Connect the included USB cable to the USB port on the tube and to a USB adapter to charge it. The charging indicator flashes red during charging and turns off when the tube is fully charged. The blue battery indicators show the current battery level. When all indicators are solid blue, the tube is fully charged. The tube needs to be powered on to see the battery level.

Inflation/Deflation

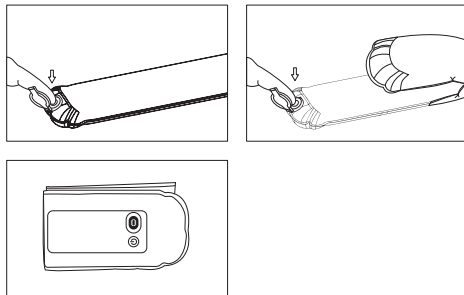

Inflation

The tube has a closed air shut-off, and the tube can be filled by blowing air directly through the air valve.

Deflation

Open the Inflation/Deflation port, press your finger down from the port and the air can be released. In order to ensure that the air in the lamp tube is completely discharged, it can be folded from the other end of the lamp tube to the air valve end and pressed to squeeze out the air.

Safety information

The tube is not a toy. Keep away from children.

Do not press down or pull the tube up with force. The tube may be damaged.

The tube contains a rechargeable Li-ion battery that cannot be replaced.
